

CSPS' Lynn Schwalk wins NDDPI Teacher of Year award

Lynn Schwalk, a mathematics teacher at Center-Stanton High School, has won Oliver County's Teacher of the Year award.

The North Dakota Department of Public Instruction recently recognized one teacher from each county of the state, with Schwalk being Oliver County's County Teacher of the Year.

NDDPI reported 496 nominations were sent in for 356 teachers, and, for the first time, nominations were from all 53 of North Dakota's counties.

Schwalk was informed of being nominated back in January, and received an email from NDDPI Superintendent Kirsten Baesler, informing her she had won last Monday.

"Honestly, I was really surprised, hon-

ored and humbled to receive the nomination much less be selected," Schwalk said. "I work with so many great educators in this building who are also so very worthy. It is great to be a part of a team that works together."

Teachers are not informed who nominated them.

Schwalk has been with CSHS since 2001, having taught grades 7-12 mathematics, but primarily just grades 8-12 for the past several years. Math subjects taught during her time include seventh and eighth grade mathematics, pre-algebra, applied mathematics 1 and 2, algebra I, algebra 2, advanced mathematics, pre-calculus, trigonometry, dual credit college algebra and dual credit college trigonometry.

CSPS Superintendent Tracy Peterson believes Schwalk succeeds in teaching because of her passion for it.

"Her passion for teaching shines through

with every class and student," he said. "She has a gift for teaching and a great sense of humor filled with compassion and empathy for each student."

Peterson continued praising Schwalk, saying she has a positive influence on everyone she meets.

"In class, in hallways, in meetings, she always makes you feel like you are most important at that moment and you have her full attention," he said. "Always wanting the best for each kid and each person."

Schwalk said she enjoys teaching and being with the students and staff at CSHS.

"I want my students to feel comfortable and know they can always ask for help," she said. "Math did not come easily to me when I was a student, so I understand how hard it can seem at times. I try to incorporate tricks, tips and everyday language into my teaching along with the formal wording to try and help my students understand."
