

Fargo VA Health Care System Seeks Volunteer Drivers

The Fargo VA Health Care System calls upon compassionate individuals to volunteer as drivers to help increase healthcare access for Veterans residing throughout North Dakota and Northwestern Minnesota. The Disabled American Veterans (DAV) Volunteer Transportation Network (VTN) Program is a courtesy service providing free transportation to and from VA medical

appointments for Veterans with limited transportation. This program assists many disabled Veterans who live on small, fixed incomes, often many miles from the local VA clinic or the main VA hospital in Fargo. "We are seeking dedicated volunteers to transport Veterans to and from vital medical appointments to our local VA Clinics, the Fargo VA Hospital, or medical appointments

with providers in the community," stated Steven Sanders, Volunteer Specialist. "Unfortunately, a growing number of our Veterans residing within rural counties face transportation challenges that hinder their access to essential medical services. Adding volunteer drivers who provide dependable, safe, and zero-cost transportation to Veterans within these areas will majorly impact Veterans' health."

Volunteer drivers play a crucial role in improving the well-being of our nation's Veterans. Their commitment allows Veterans to receive medical care that can be life-changing and even lifesaving. Key details are as follows:

Location: North Dakota and Northwest Minnesota with urgent needs in Ward County (Minot), Pembina County (Cavalier), Cavalier County (Langdon), and Cass County (Davenport).

Responsibilities: Safely transport Veterans to and from medical appointments.

Time Commitment: Flexible, based on availability, generally recommended 2x a month.

- Requirements:
 - Possess a valid driver's license.
 - Be at least 18 years old.
 - Be willing and able to pass a physical exam.
 - Verify the ability to be an insured driver.

*The Fargo VA now accepts medical and religious exemptions if you do not have the COVID Vaccine.

The Fargo VA HCS seeks at least three drivers to continue offering this service to Veterans in and around Minot, Davenport, and Cavalier and within the Ward and Pembina regions. The DAV transportation program is entirely operated by volunteers - driving daily, weekly, or monthly depending on Veteran needs.

If you or someone you know is willing to donate time to help our nation's heroes access VA healthcare by becoming a volunteer driver, please call the Fargo VA HCS at 701-239-3700 ext. 3396 or email us at VHAfarvol@va.gov. ND Completes 13-Month Medicaid Renewal Initiative

North Dakota Health and Human Services (HHS), along with its human service zone partners, has completed the 13-month federal initiative to determine eligibility for North Dakota Medicaid members whose coverage was temporarily extended due to the COVID-19 public health emergency.

Since April 2023, the human service zones have reviewed eligibility renewals for over 134,000 ND Medicaid members. HHS data shows that six in ten North Dakotans who returned their renewal form retained coverage. Those who no longer qualified either did not return their renewal forms, had an increase in income or assets or found other health care coverage.

With approval from the federal Centers for Medicare and Medicaid Services, HHS implemented several strategies to streamline Medicaid administrative processes to help reduce barriers for members, and many of the strategies are now part of the state's standard operations.

"This initiative was a monumental task for our HHS team and partners at the human service zones," said HHS Medical Services Division Director Sarah Aker. "It was the largest initiative since the state launched the Medicaid Expansion program in 2014. Eligible North Dakotans continue to have essential healthcare coverage due to these efforts."

Among the most notable enhancements include removing the burden of providing income verification from members by leveraging income information from approved data sources available in the state's eligibility system. Additionally, the enhancement allowed Blue Cross and Blue Shield of North Dakota to assist Medicaid Expansion members with renewals.

The state also made improvements to its online self-service portal used by members to manage their benefits and leveraged text and email technology to encourage members to complete their renewal paperwork to avoid possible gaps in

their coverage.

"These text and email reminders proved to be an effective way to reach members and will continue to be part of our member communication strategy," Aker said.

Addressing Needs Across Other Programs

Individuals sought out more services to support their health and well-being during the pandemic. This had a substantial impact on the human service zones and the extra workload caused a wait time for applications for economic assistance programs including the Supplemental Nutrition Assistance Program (SNAP).

To address pending applications, HHS strengthened its partnership with the human service zones in a focused, mission-driven effort to increase efficiencies, prioritize the workload and improve processing times.

While the state has seen measurable improvements, efforts are still underway to achieve a 95 percent federal timeliness rate for processing SNAP applications in the coming months.

"Over the past three months, we've been able to move the needle and improve response times across the board. Since March 1 human service zone staff processed almost 38,000 applications and reviews. We truly hope people are feeling the positive impact of more timely responses for all programs. The teams are working hard to make that happen," said HHS Economic Assistance Section Director Michele Gee.

"I couldn't be more proud of our team and the partnership we have with the zones," said HHS Commissioner Wayne Salter. "They collectively answered the call to do better for North Dakotans, and we are well on our way. We have improved from 55 percent application timeliness in January to the current status of 93 percent, we are just under the federal time standard of 95 percent and will continue to press toward the mark."

Gruener Joins NDSU Extension As Soil Health Specialist

Chandler Gruener has joined North Dakota State University Extension as a soil health specialist based at the North Central Research Extension Center in Minot. He started May 20.

Gruener will work with NDSU Extension agents and other specialists to improve soil health in many different farm production systems. In addition, he will collaborate with industry partners, stakeholder agencies, soil conservation organizations and crop commodity groups to provide soil health management education.

"A top priority for me is to help farmers and ranchers create innovative cropping and grazing systems that reach the goals they have for their operation while improving the soil we rely on," Gruener says.

Originally from Rolla, Missouri, Gruener earned a bachelor's degree in plant science from the University of Missouri and a master's degree in crop, soil, and environmental science from the University of Arkansas. He will complete his doctorate in crop and soil sciences from the University of Georgia later this summer.

Gruener's experience includes soil fertility and soil health research. For the past four years as a graduate research assistant, he has worked on soil health in multiple cropping systems using no-till and annual and perennial cover cropping strategies. He also earned a graduate level certificate in international agriculture following an internship in Brazil.

"Chandler has a passion for soil health and has conducted research and outreach efforts in various

cropping systems and agricultural regions of the U.S.," says Shana Forster, director of the North Central Research Extension Center and
