The cost of a filter
goes beyond what you pay for it.

A filter's purpose is to extend the life of your equipment by protecting it from harmful contaminants. Lower-quality filters may save you some money at the counter, but their inferior protection can cost you greatly in the long run. The smallest particles are often the most damaging. Many will-filters miss these fine particles, which results in gradual damage that often goes unnoticed - until it's too late. CNH Original Parts filters offer advanced design and durable construction that are rigorously tested by CNH Original Parts engineering to ensure you get the best heavy-duty protection for your equipment.

BE READY RIGHT OUT OF STORAGE.

Get your equipment ready for next season before going to storage with special financing and savings on parts through combine and equipment inspections.
