Interesting Facts

The Easter Island heads have bodies. In the 2010s, archaeologists found that two of the Pacific Island figures actually had torsos that measured as high as 33 feet.

Ketchup was once sold as medicine. The condiment was prescribed and sold to people suffering from indigestion back in 1834.

The moon has moonquakes. They happen due to tidal stresses connected to the distance between the moon and the Earth.

Bees can recognize and dif-

ferentiate human faces.

Candles were once eaten in famines. They used to be mainly created from beef fat or beeswax, and so they were often stolen in famines.

Wind is actually silent. What we hear is the wind blowing against an object.

The shortest day of the year generally happens in the UK on the 21st December, but it can change because the Earth's orbit around the sun takes 365.256 days, while our calendar years are 365 or 366 days.

Thank You

Sincere thank you to all who came to assist after my fall down basement stairs at the farm, specifically Kidder County Ambulance, Robinson First Responders, Volunteers from the Tuttle Fire Department and the Sheriff's Department. Thanks to my family who administered first aid until help arrived.

Darrell C. Wetzel
