In the older parts of town, several updates will be needed, especially where there is clay tile piping. Several phases were reviewed on going forward as separate projects. Maps were submitted and labeled with phases for information. The maps were created to help with funding opportunities. 32% of the sewer and 44% of the water lines are PVC and are in good condition. Water and sewer lines from the 80-90s, along with mains will need to be replaced sooner than later. Water project funding is easier to obtain than wastewater projects. Replacement and lining options were discussed. The Council will need to determine what route they would like to take. City Public Works, Nathan Nagel, was available and wondered about replacement of infrastructure along with street projects. Discussion was had on funding and what the City would want to put away every year for larger scale projects. Nathan will be a large asset in planning. A public information session will be held during next month’s meeting. Shannon Hewson will come up with some options utilizing between \$500-750k for local share.

ARMORY CUSTODIAL
CONTRACT:
